

IE TESTING CONSULTANCY LTD

Software Testing
Consultancy - Training - Management - Practise
Associated with ISABEL EVANS - *Common Sense Quality*

The Courtyard, Restdale House, 32/33 Foregate Street, Worcester WR1 1EE UK

TRAINING

- Quality management
- Software testing
- Walkthrough
- IT project management
- Time management
- ISEB accredited Foundation Certificate in Software Testing course

Typical projects for customers including ARCOS, IBM (UK), Ingenuity Unlimited, CMI, Centrefile, Semaphore Europe, Innate Management Systems Ltd, RAC:

- Design and development of presentations and courses for use by the customer
- Delivery of customers' own product courses to their customers
- Design and delivery of IE Testing Consultancy Ltd's courses
- Design and delivery of tailored and bespoke training
- Workshops and facilitated meetings

Customer Example: The Ingenuity Unlimited Training Project

When Ingenuity Unlimited wanted to recruit additional test specialists, they asked Isabel Evans of IE Testing Consultancy Ltd to provide the training and long term expert back up to the team. This was so successful that Isabel provided training throughout Ingenuity Unlimited. Ingenuity's team included existing in-house expertise and newly recruited business experts.

Isabel provided initial quality management and test training to new recruits and management development training to existing staff. Group and individual sessions were provided, where necessary tailored to individual needs. Follow-up sessions discuss specific problems in projects.

Topics tackled during the training and follow up include:

- Quality management
- Software testing
- Risk management
- Estimating
- Project management and critical path analysis
- Time management and planning by priorities
- Best practice in quality management and software testing

Ingenuity's Simon Mills said: "It was important to know that the team had a solid foundation of quality management and software test training when they started, but I also wanted staff to develop within their roles. Above all, I wanted training that would encourage and reinforce the best practices we already use here at Ingenuity Unlimited."
